-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by USPN 5,104,480 to Wojnarowski et al for the same reasons as set forth in the last Office action. Wojnarowski et al describe (column 5, lines 40-58) removal of material from a surface with a laser. Some precision method of locating the material removal boundaries is required and referring to this locating step as “scanning the substrate” is not novel. Wojnarowski et al further describe the greatly enhanced adhesion of the roughened surface of the substrate in the same paragraph.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by USPN 4,894,115 to Eichelberger et al. Eichelberger et al describe (column 6, lines 4-12) roughening a surface which removes particles, cleans, roughens, and enhances adhesion.

### ***Response to Arguments***

Applicant's arguments filed December 28, 2004 have been fully considered but they are not persuasive. Applicant argues that the prior art, Wojnarowski et al and Eichelberger et al, does not describe the instant claimed scanning and roughening processes. This argument is not persuasive. The newly claimed “scanning the

substrate for irregularities for removal" is inherent in the prior art in order to determine the boundaries of the material removal process step. The prior art roughening of the surface will inherently include removal of the irregularities. The end result of the ablation processes is a surface which is both cleared of irregularities and roughened.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Badalec et al, Tandy et al, and Brodsky describe laser texturing and subsequently bonding.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
